

19 June 2012

ASX ANNOUNCEMENT

Canning Basin Update

Stratum Metals Limited' ('Stratum' or 'Company') is pleased to announce the final stage of the Heritage approval process will commence on 9 July 2012 which will allow Stratum to commence drilling on the prospective coal tenement in the Canning Basin, map included below.

The final Heritage Clearance Survey will take three days to complete with the survey outcome available approximately one week later. The survey requires 1 day helicopter aerial view with the native title group and 2 days vehicle/ground work.

Furthermore Stratum has been in discussion with a number of major Chinese Companies and will keep the market informed as to the progress of the discussions.

Please visit the Company's website to read most recent news release in relation to the above.

A detailed update on Stratum's exploration program for the Canning Basin will be released after the Heritage Survey is completed and approved.

Regards

Martin Holland
Managing Director

About Stratum Metals Limited

Stratum Metals Limited was formed to utilise some of the latest innovations in geosciences to target areas in Western Australia prospective for the discovery of gold and copper-gold ore bodies.

Stratum Metals has acquired a tenement portfolio located in the prospective gold and copper mineralisation region of Yilgarn in Western Australia.

These tenements cover a range of mineralising systems in known and emerging mineral provinces in Western Australia, where potential exists for new gold, copper and nickel discoveries.

Stratum Metals has commenced comprehensive and intensive exploration of the targets identified in the search for new ore bodies.

The Company's wholly owned subsidiary, Stratum Coal Pty Limited, has been incorporated with a view to acquiring coking or thermal coal tenements domestically and internationally.
